

ADVANTAGE WALK APP - GETTING STARTED

Getting started:

1. Go to the app store on your phone and search for Advantage Mobile and download the free app. *It should be the first choice that is shown by Bridgetree, Inc.*
2. Open the app once downloaded and type in your Username and Password that your Field Director or Field Organizer has given to you and select "Login"
3. When a pop-up asks for permission to allow location access, select "Allow". (This is very important. The app will not be able to process your payroll without this enabled.)
4. Select "Start" in the top right corner of the screen to see your assigned door lists. *Do this every day before starting canvassing to make sure the most current door lists are displayed. Finished or almost finished door lists will be removed from your account each night.*
5. Select "Assigned Walk Book" to download the list of voters assigned to you for canvassing. There may be one or multiple door lists at a time for you to choose from. Do not select "Walk Route From My Location"
6. Select a walk book by touching on one of the walk book names.
7. View the walk book in map mode to determine the most efficient route. Pick your first street and select the first household on your route. *Swipe right or left to get to other pages in the walk book. The blue arrow marker indicates the house that is closest to your current location. The number inside the outline of a house indicates number of voters in the household.*
